STATISTICS OF INCOME, CALENDAR YEAR 1918.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., December 23, 1920.

HON. DAVID F. HOUSTON,
Secretary of the Treasury.

SIR: I have the honor to transmit herewith the following statistical report of economic data compiled from the returns of net income (individual, corporation, and partnership) filed for the calendar year ended December 31, 1918.

PERSONAL INCOME-TAX RETURNS.

The number of personal returns filed as of the calendar year ended December 31, 1918, was 4,425,114. The total amount of net income reported by these returns was \$15,924,639,355, and the tax (normal tax and surtax) amounted to \$1,127,721,835. The average amount of tax per individual was \$254.85, and the average tax rate 7.08 per cent. As compared with 1917, the above figures show a growth of 952,224 in the number of returns filed, and an increase in the total net income reported amounting to \$2,272,256,148, likewise an increase of \$436,228,881 in the total tax.

The following table shows, by income classes, the distribution of the personal returns, giving the number of returns filed, the amount of net income, and the tax yield; also cumulative totals and relative percentages.

The distribution of the returns reporting net income not in excess of \$5,000 was based on a comprehensive study and analysis of the data obtained from a sufficient number of such returns filed in each collection district to have constituted a fair average sample of the total.

Simple and cumulative distribution of personal returns, by income classes, calendar year 1918.

PARTNERSHIPS AND PERSONAL SERVICE CORPORATIONS.

The revenue act of 1918 prescribes that the net income reported by partnerships and personal service corporations be not taxable to such returns, but that such income shall be included in the returns of net income of the individual members or stockholders, according to their distributive share, whether distributed or not.

The number of returns and income reported by these two forms of association are shown below.

The definition of "personal service corporation," as contemplated in the above referred to provision, is given in section 200 of the revenue act of 1918:

The term "personal service corporation" means a corporation whose income is to be ascribed primarily to the activities of the principal owners or stockholders who are themselves regularly engaged in the active conduct of the affairs of the corporation and in which capital (whether invested or borrowed) is not a material income-producing factor * * *.

CORPORATION INCOME-TAX RETURNS.

Corporation income-tax returns for the calendar year 1918, other than personal service corporations, numbered 317,579. Of these 202,061 reported net income amounting to \$8,361,511,249; income-tax \$653,198,483; war profits and excess profits tax \$2,505,565,939; total tax \$3,158,764,422.

For the calendar year 1917, the total number of returns was 351,426, of which 232,079 reported net income of \$10,730,360,211 and tax aggregating \$2,142,445,769.

The decrease in the number of returns, and in the amount of net income reported by corporations for 1918, as compared with 1917, is due in great part to the following changes in reporting incomes:

1. *Consolidated returns.*—Article 632, Regulations 45, revenue act of 1918, specified that—

Affiliated corporations, as defined in the statute and in article 633, are required to file consolidated returns on Form 1120. The consolidated return shall be filed by the parent or principal reporting corporation in the office of the collector of the district in which it has its principal office. Each of the other affiliated corporations shall file in the office of the collector of its district Form 1122. * * *

The effect of the above provision, other than the reduction in the number of returns of net income filed, was to reduce the aggregate amount of net income or net loss that would have been reported had each subsidiary unit filed a return of net income as was the case for the calendar year 1917. Thus, for example, a consolidated return may contain 15 subsidiaries, 10 of which have net incomes aggregating \$1,000,000, the other 5, deficits amounting to \$600,000. The net income of the consolidated return, however, would be \$400,000. Therefore, the statistics would report one return of net income of \$400,000, whereas had each subsidiary filed an independent return of net income, there would have been, as above stated, 10 returns reporting net income aggregating \$1,000,000 and 5 returns showing deficit totaling \$600,000. No estimate as to the amount of income affected can be given.

2. *Personal-service corporations.*—As previously stated in the section of this report relating to personal-service corporations, such returns in 1918 were not subject to tax as were other corporations. They are accounted for under their proper heading.

3. *Dividends exempt from tax.*—The revenue act of 1918 provides, section 234 (a): "That in computing the net income of a corporation subject to the tax imposed by section 230, there shall be allowed as deductions—

"(6) Amounts received as dividends from a corporation which is taxable under this title upon its net income, and amounts received as dividends from a personal-service corporation out of earnings or profits upon which income tax has been imposed by act of Congress."

Dividends were reported in the returns of net income for 1914 and 1917, inclusive. The amount of dividends excluded from the income in corporation returns for 1918, is not available.

CORPORATION INCOME DISTRIBUTED BY INDUSTRIAL GROUPS.

In the table below are shown the returns of corporations distributed by industrial groups and segregated according to those reporting net income and those reporting no net income. In the transportation and public utility group, both gross income and general deductions lack approximately \$5,000,000,000. This is due to the returns of railroad and other utility corporations, to a great extent, reporting on the face of the return, merely the amount of net income or deficit. To have inspected the numerous supporting schedules of these returns for the purpose of compiling the gross income and general deductions was inexpedient, due to the cost and the additional time that it would have required.

INCOME RETURNS BY STATES.

COMBINED PERSONAL AND CORPORATION INCOME AND TAX.

The following table exhibits by States and Territories the combined personal and corporation incomes and income taxes for the calendar year 1918. The figures do not represent, however, what may be called the geographical distribution of income. They are based upon the returns filed in each State. An individual files his income-tax return in the district in which is located his legal residence or principal place of business, and a corporation files its income tax return in the district in which is located its principal place of business or the principal office or agency. Consequently income reported by an individual or corporation in one State may have been derived from sources in other States.

From the foregoing it will be clear that there is no way of ascertaining from the income-tax returns the amount of income earned in the respective States or the amount of tax paid on that basis.

In the study of the above table it should be observed that in 1917 and 1918 the figures represent net amounts, the gross income having been reduced by the deductions applicable to each source. The item "General deductions" represents such other deductions as were not chargeable to any of the sources of income and includes interest on personal indebtedness, taxes on dwellings, and personal property, and other taxes not reported elsewhere; also other miscellaneous deductions, including contributions in 1918 but not in 1917. The amounts shown for 1916 represent gross income, the general deductions not having been allocated to the several sources.

¹ The net income reported on separate returns made by husband and wife in 1916 are combined and included as one return in the figures for the several classes. In all other years the returns of married women filed separately are included in their individual income classes independent of husbands' income.

NOTE.—The returns for 1913 are omitted, as they pertain only to the last 10 months of that year.

Returns of net income by years.
